

Light Support Weapon (L86A1)

From the same family as the SA 80 Individual weapon, the LSW has a heavier and longer barrel, allowing greater muzzle velocity and accuracy than the Individual Weapon. When fired from the integrated bipod, and using the standard SUSAT sight, the LSW is impressively accurate and consistent.

-
- Weight 7.28kg with loaded magazine and optical sight;
 - Length 900mm;
 - Muzzle Velocity 940m/s;
 - Feed 30 round magazine;
 - Effective Range 800m;
 - Cyclic Rate of Fire 610-770 rounds/min.

Other features

- Muzzle flash eliminator
- Bipod - extendable
- Out rigger – protects barrel
- Gas parts
- Rear pistol grip
- Butt strap
- Change lever – R (repetition) A (automatic)

Susat

Made in conjunction with the SA 80 range, it contains tritium gas (radioactive) that allows the needle to glow for accurate firing at night. It has x4 magnification giving more accuracy than with an iron sight.

Sight
Unit
Small
Arms
Trilux

Features

x4 magnification
EBS – Emergency Battle Sight
Illuminating needle – for use at night

Safety: On braking

- If in a closed area, open all windows and doors to aid ventilation.
- Do not touch broken parts.
- Avoid inhaling fumes
- Contact the medical officer and the armourer.
- No naked flames.
